**“Tree For All” Tree Sale and Planting Workshops presented by Cox,  
Saturday, November 4  
Thousands of trees to be sold for low cost, 100 given away**

Oklahoma City, OK -- The Myriad Botanical Gardens, with presenting sponsor Cox Communications, will present [Tree for All](#) on Saturday, November 4 from 9am to noon. It will be a day focused on the benefits of trees and how to care for one, or two, of your own. Thanks to our presenting sponsor Cox Communications, along with Rotary International and a continued partnership with the Tree Bank Foundation, we are offering 1,000 trees to the community for a low cost.

Trees will be available for \$9 for members, \$10 for nonmembers and individuals can purchase up to two trees per household. In addition, we will offer 100 free trees to the first 100 people at Tree For All.

Enjoy tree planting demonstrations and workshops throughout the day with planting and care tips. We'll also have a variety of booths and vendors with more information and products for taking great care of your tree.

One of Cox Communications initiatives is focused on reducing waste and energy consumption, as well as conserving water. This makes a day devoted to tree education and plantings perfectly aligned with their focus, as trees offer more than aesthetic benefits.

The Myriad Botanical Gardens is one of Oklahoma City's most beloved public spaces, offering its visitors a 15 acre natural escape in the very heart of downtown. A half-acre children's garden, an off-leash dog park, restaurant space, splash fountains, and paths for walking and jogging provide guests young and old with a place to seek solitude with nature, or seek community and the company of others. Additionally, the Myriad Gardens offers a variety of horticultural education programs for adults and children.

The Crystal Bridge Tropical Conservatory's unique design has earned attention and praise in the architectural community. It is 224 feet long, 70 feet in diameter, and is covered by 3,028 sections of translucent, double-layered acrylic panels. The Conservatory includes 13,000 square feet of plant display area in two distinct climates: the Tropical Wet Zone, which is at the south end and is watered daily; and the Tropical Dry Zone at the north end which receives water from April through September, followed by drought from November through March. Some 2,000 varieties of plants and a 35-foot waterfall round out the spectacular features of the Conservatory.
